All code of conduct guidelines is available to view on the LHYSL website.

1.11 Grievance Procedure & Policy

LHYSL GRIEVANCE/COMPLAINT PROCEDURE

Our goal is to provide a positive experience to all the players within our organization. We realize that occasionally an issue may arise that requires the attention of a program coordinator and/or the LHYSL Board of Directors. These issues might involve the rules, policies or procedures of the County League and/or the Licking Heights Youth Sport League.

We have designed our Grievance Policy to provide a process whereby an individual can communicate an issue or concern for review and resolution. Please help us by adhering to the following guidelines.

Should you have an issue with a rule, policy or procedure:

1. Please communicate it to your coach. Before a season begins, the coordinators of the various sports have a meeting with the coaches. Most of the rules, policies and procedures are communicated to your coach at that meeting. If not, please ask your coach to call or e-mail that specific program coordinator for an answer. One call from a coach is more efficient than 10 calls from parents and you will find you will get a quicker response for obvious reasons.
2. Should your coach not get a clear and timely response, please send an e-mail or letter to the LHYSL email. This request will be handle quickly and forwarded to the Program Coordinator and Board President.

Should you have an issue or concern with the treatment of your child (i.e. fair play issues, treatment) please use the same procedures as above.

All grievances that need LHYSL Board attention should be in writing, using our grievance form located on our LHYSL website, with the facts and names of people involved. The Board will only review grievances/complaints that are in writing on the proper form. Any written correspondence directed to the Board or President will be addressed at the next LHYSL Board meeting or sooner depending on the situation.

Please remember that the LHYSL Board is made up of volunteers and that the LHYSL is a Youth Sports Organization. Be cognizant of the fact that our decisions involving grievances will be what we feel is in the best interest of the children in our program. All decisions of the LHYSL Board shall be final.

LCLYF (Licking County League) GRIEVANCES

Grievances that are to be made to the LCLYF are for issues derived from the football game itself, processes surrounding the event and/or volunteers/coaches involved with the event. Those grievances will only be made to the league commissioner from the Football Director or Board President from each individual youth sports league involved in the event. The LCLYF will NOT accept any grievances for what would be perceived as a local league issue and will be referred back to the proper process stated above.

The LHYSL Board of Directors may add, delete or alter any rule or policy in this handbook at anytime. All coaches, volunteers, and parents affected by the changes will be notified of those changes by the LHYSL Board, via email.

The equipment manager must review the following items with each team and coaches before the equipment is handed out during equipment handout day:

It is up to all coaches and parents to continue to promote the proper methods for handling the equipment. Most importantly taking care of the helmets as this results in the most expensive costs for refurbishing.

6.2 Timekeeper Football

The clock operator at a football game is a position that needs to be performed with a great level of care. Football has always been called a game of inches and seconds. One extra inch on the field or one extra second on the scoreboard clock can create an unfair advantage for one of the teams. The clock operator must know the correct National Federation of State High School Associations football timing rules inside and out before he can operate the clock at a real game.

6.2.1 Pre-Game

Game Clock
Set pregame clock for thirty to sixty (30 - 60) minutes before the start of the game and let it run down. This lets the two teams and referees know when the game should start

6.2.2 Game Clock & Halftime

Set each quarter game clock based on table below:

Division	Game Clock
Mini	Seven minute (7:00) middle school clock for all four quarters.
Junior	Eight minute (8:00) middle school clock for all four quarters.
Senior	Eight minute (8:00) middle school clock for all four quarters.
Half-time	Ten (10:00) minutes and let count down.

6.2.3 Clock Start/Stop Rules

Touchdown: Stop the clock after every touchdown. The referee should blow his whistle when one of these plays occurs, which is your signal to stop the clock.

Extra Points: The clock should remain stopped during all extra points and 2-point conversions.

Plays near Sideline (In and Out of Bounds): Identify the nearest referee to the play when the game action is close to one of the sidelines. An official may give a winding signal to indicate the ball is still in bounds and follow it by a stop-the-clock signal for an apparent first down. If a player goes out of bounds the clock needs to be stopped and the referee will blow the whistle and raise one hand in the air as he stands on the spot where the runner went out of bounds.

Dead Ball Punts: There will be no punting. Ball will advance 35 yards from previous 4th down spot and change of possession. Clock should be stopped for all dead ball punts.

Player in Bounds: Allow the clock to continue to run if the player with the ball is downed in the field of play. This is one that could trick you as the clock operator, because the referee will blow their whistle, but that only indicates the player is down and the play is over. If a player is hurt, the referee will blow his whistle again and wave both of his hands over his head to signal to you that the clock needs to be stopped.

1st Down: The clock always stops on a first down. If a play ends close to the mark for a 1st down, the referee may request a measurement. If this happens, the referee will blow his whistle again and wave both of his hands over his head to signal to you that the clock needs to be stopped.

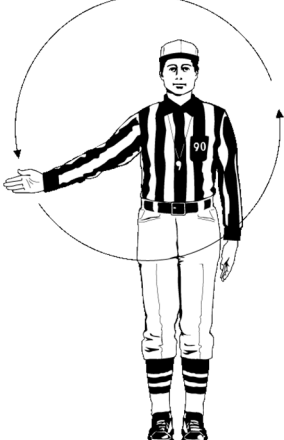

1st Down Ball Spotted: If the player went out of bounds for 1st down, the clock starts on the snap of the ball. If the player went down in bounds, once the referee has spotted the ball for first down, they will blow the whistle and circle one hand in a winding motion indicating to start the clock again.

2 Minutes of a Half: Be prepared to stop the clock for a lot of different plays in the last 2 minutes of a half or game. A team's quarterback may choose to spike the ball to stop the clock. If this happens, the clock continues to run until the quarterback has received the ball from his center and then throws the ball directly in the ground. The referee will blow the whistle to signal you to stop the clock.

Time Outs: Stop the clock if there is a team timeout or a referee timeout. The referee will blow his whistle and wave both of his hands over his head to signal to you that the clock needs to be stopped. Start the clock on the snap of the ball.

Penalties: The clock will stop for penalties (immediately for false start, illegal procedure and encroachment) or upon conclusion of the play for other penalties (holding, block in the back). If the clock was running when the penalty occurred, the officials will start the clock when the ball is made ready for play. If the clock was stopped when the penalty occurred, the clock will remain stopped until the snap. **WATCH THE OFFICIALS FOR THE SIGNALS.**

Incomplete Pass: Stop the clock once a ball has hit the ground because of an incomplete forward pass. The clock starts on the next snap of the ball.

	<p>STOP THE CLOCK SIGNAL Hands crisscrossed above head.</p> <p>Referee's Time Out. Same signal followed by placing one hand on top of cap.</p> <p>Touchback. Same signal followed by arm swung at side.</p>
	<p>RE-START THE CLOCK SIGNAL Full arm circled to simulate moving clock.</p> <p>The clock operator should always watch the head referee (normally lines up behind the ball.) He will wind his arm like a windmill to start the clock. If no such signal is given, the clock should start on the snap</p> <p>The head referee is the only one who can start the clock once it is stopped. Any referee may stop the clock.</p>

Mercy Rule: The mercy rule states that when the point difference reaches 35 points in the second half, there will be a **running game clock with the exception of timeouts, scores or an injured player.**

6.3 Timekeeper Wrestling

The clock operator at a wrestling match, meet, or dual is a position that needs to be performed with a great level of care. Wrestling has always been called a match of time and effort. The clock operator must know the correct National Federation of State High School Associations wrestling timing rules inside and out before he can operate the clock at a real match, meet, or dual.

6.4 Announcers

The Center area, which is a 7-meter diameter circle. The Starting area, which is a one-meter circle in the very center of the mat. The Passivity zone, which is a one-meter band around the perimeter of the Center area. The passivity zone may be marked by taping a line of dashes inside the out-of-bounds line. The Protection area, which should extend a minimum of 1.5 meters beyond the Passivity zone. The inner 10-foot folkstyle circle has no meaning internationally, and when standing, the contestants start in the middle, facing each other about a meter apart. It is not mandatory that the athletes begin the match or subsequent restarts on any "starting" lines. One corner of the mat should be marked in red and the other in blue, so the wrestlers and the coaches know where to report. This can be done with colored chairs, with colored plywood under the chairs, or simply with red and blue signs. The red corner should be on the referee's left as he faces the judge's table. UWW approved mats are not required for domestic competition. For local and state level competitions for the age groups Schoolboy/girl and lower, mats less than full size but not less than a quarter of a full-sized (standard) mat may be used when necessary. Adequate protection around all mats should be in place. The protection area must be clearly marked. Each pair of wrestlers is entitled to a wrestling area devoid of obstructions, including other wrestlers, coaches, and observers, etc. On mats where a line is used to indicate the out-of-bounds, the outermost edge of that line is considered as the true out-of-bounds. For purposes of this rule, the line itself is still considered part of the wrestling area. The area around the mats should be large enough to accommodate a table for the mat chairman and volunteer clock controllers, a table for the judge, one or two score clocks, and any necessary video equipment used. There should still remain adequate space for the protection of the athletes.

9.5 Weigh In & Roster Exchange (Football & Wrestling)

Head Coaches should exchange a copy of their roster using the form found in the LCLYF & LCYWL rules book. This roster must be completed with name, jersey #, DOB, Age and weight. The roster should match that which is published. Using the Rosters, the head coaches can decide specifically which players they wish to have weighed in. They have the option to weigh everyone or no one if they wish.

9.5.4 Weigh Ins

Coaches should line up their players/athletes, Football: with white stripers off to the side with the helmets on. Home Team will go first and have all their players weighed at the Away Team's request. When the Home team is done, they can return to warm-ups.

11 Lightning Safety Rule - Football

11.1 “30-30” Lightning Safety Rule

The existence of blue sky and the absence of rain are not protection from lightning. Lightning can and does, strike as far as 10 miles away from the rain shaft. It does not have to be raining for lightning to strike. The key to a **lightning safety plan of action** is knowing the answer to the following two questions:

1. How far away am I (or the group who I am responsible for) from a safe location?
2. How long will it take me (and/or my group) to get to the safe location?

These questions need to be answered **before** lightning storms threaten. By knowing the answer to the above questions, you will greatly increase your chances of **not** becoming a lightning strike victim.

Lightning awareness should be increased with the first flash of lightning or the first clap of thunder, no matter how far away. This activity must be treated as a wakeup call to those monitoring inclement weather. The important aspect to monitor is how far away the lightning is occurring, and how fast the storm is approaching, relative to the distance of a safe shelter.

11.2 Suspension of Play

To estimate the distance between you and a lightning flash, use the “**Flash to Bang**” method.

The Flash to Bang method is the most reliable, easiest and most convenient way to estimate how far away lightning is occurring. Thunder always accompanies lightning, even though its audible range can be diminished due to background noise in the immediate environment, and its distance from the observer. Audible range of thunder is about 8-10 miles.

The premise upon which the Flash to Bang method is based is the fact that light travels faster than sound, which travels at a speed of approximately one mile every 5 seconds.

Play is suspended	Practice and all play to be suspended when the Flash to Bang method reaches 30 seconds. This indicates the lightning is at the 6 mile range.
Resumption of Play	Practice and play can continue only when lightning or thunder has not been detected for 30 minutes. Every time lightning or thunder is detected within the 30 minutes, the clock restarts.

11.2.1 How to use Flash to Bang

Count the number of seconds, once lightning is sighted, until the thunder (bang) is heard.

Divide by 5 to obtain how far away (in miles) the lightning is occurring. Example: If an individual counts 15 seconds between seeing the flash and hearing the bang, 15 divided by five equals three; therefore, the lightning flash is approximately three miles away.

As a minimum, the National Severe Storms Laboratory (NLSS) and NCAA Committee on Competitive Safeguards and Medical Aspects of Sports strongly recommend that by the time the observer obtains a Flash to Bang count of 30 seconds, all individuals should have left the athletics site and reached a safe structure or location. Athletic events may need to be terminated.

11.2.2 Speed of Storms

A typical thunderstorm can travel up to 30 miles per hour. Experts believe 30 minutes allows for thunderstorms to be about ten to twelve miles from the area. This minimizes the probability of a nearby, and dangerous, lightning strike.

The LHYSL Board of Directors may add, delete or alter any rule or policy at anytime. All coaches, volunteers, and parents affected by the changes will be notified of those changes by the President, via email, before they become effective.
