

1. Weekday -- A decision will be made as early as possible. Please watch the website and/or Facebook Page for updates. No need to call, email or text...a decision will be made and we will let you know. Website & Facebook should be your first place to check.

2. Weekends -- Nick or Jay will make the call as early as possible. Opening DOD, if there is any doubt, ie it rained the night before, there is standing water on ANY field or is drizzling that morning, DO NOT UNLOCK the gates....only let yourself in until you are in contact with Nick, Jay or assigned eboard member who will make the call. We will not open the complex just to play on a few fields. If you are NOT the opening DOD....please do not open the gates. We don't need a bunch of people on the complex "trying" to help. If help is needed, an email will be sent out. League directors, please let your managers know that a decision probably won't be made until at least 7am....so yes, their team may be inconvenienced if they have the 8am game. Calling, texting, emailing will not speed up the process. The website and Facebook page will be updated as soon as possible and that is where they should look first for any current information. Please note that it is at Nick's & the commissioners discretion if we are to cancel the whole day or try to get afternoon games in on the weekend after the fields have been worked on in the morning.

3. Once Games have started -- it then becomes the umpires decision. They will make the call accordingly for the field they are on. The DOD may then make the call to cancel future games that day. Again, we will not keep the complex open only to play on a few fields. Should this occur, please notify commissioners immediately.
